

:FOOD FOREST GARDEN WORKSHOP:

LEARN HOW TO USE TREES IN YOUR GARDEN SO YOU CAN GROW
AN ABUNDANCE OF FRUIT, VEGETABLES & NUTS

LIGHTNING
RIDGE 17th Sept '16

Introduction to
designing a perennial
tree food production.

ONE DAY INTRODUCTION TO TREE SYSTEMS

This workshop will teach you how to create a cool oasis in a semi-arid environment by designing an ecologically diverse food forest. Trees can provide food, fibre and fuel and are an important part of a food system. Learn how mimicking mother-nature through the use of perennial plant poly-cultures (multi-species, multi-storied food systems) is regenerative to the land and will provide you with an annual yield for years. This one day workshop will give you both hands on experience and design opportunities in a semi-arid climate. **This 1 day workshop is day 3 of a 5 Day Permaculture Practical Design (15 – 19 September 2016)** , please enquire when you book.

Date: Saturday 17th September 2016

Time: 9am to 5pm

Location: The Hungry Spirit Centre For Semi-Arid Regeneration in Lightning Ridge NSW.

Course Investment: \$195 per person inc morning and afternoon tea. BYO lunch.

Your instructor for the day is Permaculture designer & teacher Nick Huggins. www.nickhuggins.com.au

To secure your place or enquire about the other workshops and Course contact Rebel Black phone: 0419 639 380 email rebel@thehungryspirit.com
